

byteBuilt 1.0

INNOVATE. IDEATE. INSPIRE.

Organized by: byteXL & Chandigarh University

Mode: Offline (24-Hour Hackathon)

Venue: Room 101, C3 Block, Chandigarh University, Mohali

About the Hackathon

byteBuilt 1.0 is a 24-hour innovation hackathon where all college students collaborate to solve real-world problems by building creative and practical technology solutions.

Participants will work in teams to identify a problem, design an innovative solution, build a prototype or proof of concept, and present it before an expert jury.

Who Can Participate?

- Open for **All University/College students..**
- Team Size:
 - Minimum: **3 Members**
 - Maximum: **4 Members**
- Teams can be self-formed.
- Every team must choose a unique team name.

Themes And Sample Problem Statement

Domain	Sub-Domain	Expected Outcome
AI for Business	Predictive Analytics & Forecasting	Data-driven models that anticipate business outcomes (demand, churn, risk) ahead of time, enabling proactive decisions instead of reactive ones.
	Fraud & Risk Detection	Systems that identify anomalous or risky behavior in transactions/operations in near real-time, reducing losses without over-flagging genuine users.
	Process & Document Automation	AI tools that automate repetitive screening, evaluation, or documentation tasks, cutting manual effort and improving consistency.
	Customer Intelligence & Personalization	Solutions that understand customer behavior/needs to enable targeted, cost-effective engagement and retention strategies.
AI for Everyday India	Agriculture & Rural Livelihoods	AI tools that give farmers timely, accessible information (prices, crop health) in their own language, improving income and reducing losses.
	Urban Mobility & Infrastructure	Predictive systems that ease traffic, congestion, or infrastructure strain in fast-growing cities through data-driven planning.
	Public Service Accessibility	Conversational or low-bandwidth tools that simplify citizens' access to government schemes and services, especially in regional languages.
	Regional Language & Voice AI	AI interfaces that work in local languages and voice, making technology usable for non-English-fluent or low-literacy users.
AI in Education	Personalized & Adaptive Learning	Systems that adjust content and pace to each student's level, improving learning outcomes despite large class sizes.
	Assessment & Evaluation Automation	Tools that grade or assess student work fairly and consistently, reducing evaluator workload and bias.
	Student Support & Retention	Early-warning systems that identify at-risk students and guide appropriate academic, financial, or counselling interventions.
	Intelligent Tutoring Systems	AI assistants that resolve student doubts on demand and identify recurring conceptual gaps over time.
AI for Healthcare	Clinical Decision Support	AI systems that help clinicians make safer, faster decisions — e.g., flagging drug interactions or diagnostic risks.
	Patient Monitoring & Diagnostics	Continuous or image-based monitoring tools that detect

		early warning signs and reduce unnecessary alert load on care teams.
	Health Records & Data Security	Secure, tamper-evident systems for managing and sharing patient data across providers while protecting against misuse.
	Medical Documentation Automation	AI tools that convert clinical conversations into structured records, reducing physician administrative burden.

Hackathon Flow

Phase 1 – Registration & Idea Submission

- Register your team through the official registration portal.
- Submit the team details.
- Submit a **Pitch Deck (PPT)** explaining your idea.
- Each team may submit **only one idea**.
- Ensure that the idea is original and aligns with the hackathon themes.
- More than **100 teams** are expected to participate.

Phase 2 – Shortlisting

Based on the submitted Pitch Decks, the **Top 60 teams** will be shortlisted for the next round.

Phase 3 – Project Video Submission

The shortlisted teams must submit a **project presentation video** demonstrating their proposed solution.

Video Specifications

- **Duration:** Minimum 2 minutes and maximum 4 minutes.
- **Format:** MP4
- **Resolution:** 1080p (Full HD) preferred (*Minimum: 720p HD*)
- **Orientation:** Landscape (16:9)
- **Frame Rate:** Minimum 24 FPS
- **Audio:** Clear and audible with minimal background noise.
- **Language:** English (preferred) or English with subtitles if required.

Note: Please upload an unlisted youtube link in google form provided after the selection process.

Video Quality Guidelines

- Ensure the video is **well-lit** and clearly visible.
- Use a **stable camera or tripod** to avoid shaky footage.
- Record in a **quiet environment** with clear audio.
- Screen recordings should be **high resolution** so that the prototype and UI are easy to read.
- Avoid excessive background music or distracting visual effects.
- Ensure all team members are **clearly visible and audible** while presenting their respective contributions.
- Verify that the video plays correctly before submission.

The Project Video Should Cover:

1. **Team Introduction**
 - i. Team name
 - ii. Member introductions
 - iii. Individual roles and responsibilities
2. **Problem Statement**
 - i. What problem are you solving?
 - ii. Why is this problem important?
3. **Proposed Solution**
 - i. Explain your idea clearly.
 - ii. Highlight the uniqueness and innovation.
4. **Technology Stack**
 - i. Tools, programming languages, frameworks, APIs, or AI tools used.
5. **Expected Impact**
 - i. Who will benefit from your solution?
 - ii. What real-world impact can it create?
6. **Future Scope**
 - i. Possible enhancements and scalability of the project.

Based on the project videos, the **Top 40 teams** will be selected for the Grand Finale(In Person) at Chandigarh University, Mohali.

Phase 4 – Grand Finale (24 Hours)

The shortlisted teams will participate in a **24-hour hackathon**, where they will:

- Build and refine their prototype.
- Enhance features and functionality.

- Receive mentorship from industry experts.
- Prepare the final project demonstration and presentation.

Phase 5 – Final Presentation

Each team will present their solution before the jury.

Presentation Format

Presentation and Jury Q&A : Maximum 7 minutes for presentation and 3 minutes for Q&A.

The jury will evaluate the projects based on innovation, impact, feasibility, prototype quality, and presentation before announcing the winners.

Technologies You Can Use

Participants are free to use any suitable technology.

Examples include:

Category	Technologies / Tools
Programming Languages	Python, Java, C/C++, JavaScript
Frontend & Design	HTML, CSS, JavaScript, Figma, Canva, PowerPoint
Development Tools	VS Code, Cursor, GitHub
AI Tools (Allowed)	ChatGPT, GitHub Copilot, Cursor AI, Other AI productivity tools

Note: AI tools may assist you, but your solution, implementation, and presentation must represent your team's original work.

Submission Requirements

Each shortlisted team must submit:

- Prototype / Working Model
- Source Code
- Presentation (PPT)
- Documentation

Judging Criteria

Projects will be evaluated by an expert jury based on the following criteria:

Evaluation Criteria	Description	Marks
Innovation	Originality of the idea, creativity, uniqueness of the solution, and the team's approach to solving the problem.	25
Impact	Relevance of the problem, potential social or business impact, scalability, and overall value of the solution.	25
Feasibility	Technical feasibility, practicality of implementation, resource requirements, and sustainability of the proposed solution.	20
Prototype Quality	Functionality, user experience, completeness of the prototype, technical implementation, and overall quality.	20
Presentation & Q&A	Clarity of presentation, communication skills, demonstration, time management, and ability to answer judges' questions effectively.	10
Total		100

Note: The decision of the jury will be final and binding. No requests for re-evaluation or score revisions will be entertained.

Event Rules

General Rules

- Participation is allowed only in registered teams.
- One idea per team.
- All work must be completed during the hackathon.
- Every member should actively contribute.
- Teams must follow the event schedule.
- Maintain professional behaviour throughout the event.

Originality

- Projects must be original.
- Plagiarism is strictly prohibited.
- Existing projects cannot be submitted.
- If inspiration is taken from another source, proper credit must be provided.

Use of AI

AI tools are permitted for:

- Research
- Brainstorming
- Coding assistance
- UI generation
- Documentation support

However, teams must understand and explain every part of their solution.

Event Day Timeline (24-Hour Hackathon)

Time	Activity
09:00 AM – 09:30 AM	Registration & Check-in – Participant verification, kit distribution, and seating.
09:30 AM – 10:00 AM	Event Kick-off & Briefing – Welcome address, hackathon guidelines, judging criteria, rules, and introduction of mentors and jury members.
10:00 AM – 10:30 AM	Problem Statement Briefing & Team Setup – Final instructions, environment setup, and clarification session.
10:30 AM	Hackathon Officially Begins
11:00 AM – 01:00 PM	Ideation, planning, and initial prototype development.
01:00 PM – 02:00 PM	Lunch Break
02:00 PM – 07:00 PM	Prototype development, mentor interactions, and progress reviews.
07:00 PM – 08:00 PM	Dinner Break
08:00 PM – 12:00 AM	Continued development, testing, debugging, and feature implementation.
12:00 AM – 07:00 AM	Overnight development with mentor support and periodic check-ins.
07:00 AM – 08:00 AM	Breakfast Break
08:00 AM – 09:30 AM	Final testing, documentation, presentation preparation, and project submission.
09:30 AM	Project Submission Deadline
09:45 AM – 11:15 AM	Final Presentations to the Jury (Session 1) – Each team will have 10 minutes to present and demonstrate their solution, followed by Q&A from the judging panel.
11:15 AM – 11:35 AM	Tea Break
11:35 AM – 01:45 PM	Final Presentations to the Jury (Session 2) – Remaining teams present their solutions to the judging panel.
01:45 PM – 02:15 PM	Prize Distribution & Closing Ceremony – Announcement of winners, trophy and medal distribution, certificate distribution, and closing remarks.

02:15 PM

Event Concludes

What to Bring

We Recommend participants to carry:

- Laptop(Mandatory)
- Laptop Charger(Mandatory)
- Student ID Card(Mandatory)
- Mobile Charger
- Power Bank
- Water Bottle
- Required Software Installed Before the Event

Code of Conduct

Participants are expected to:

- Respect fellow participants, judges, mentors, and organizers.
- Follow all event instructions.
- Avoid any unfair practices.
- Maintain discipline throughout the event.

Violation of rules may result in disqualification.

Overall Timeline

Stage	Activity	Dates
Stage 0	Registration Starts	27 July
Stage 1	Team Formation and Pitch Deck submission	28 July - 20 Aug
Stage 2	Team Shortlisting	21 Aug - 25 Aug
Stage 3	Video Submission	26 Aug - 1 Sep
Stage 4	Final Shortlisting	2 Sep - 6 Sep
Stage 5	Inter Students Arrival	Before or On 14 Sep
Stage 6	Final Prototype Development	14th Sep

Stage 7	Final Presentation and Judging	15th Sep
Post-Event	Results Announcement and Awards	15th Sep

Prize Pool

Position	Prize Money	Trophy	Certificate
 First Prize	₹75,000		
 Second Prize	₹45,000		
 Third Prize	₹30,000		

Participation Certificate

Every eligible participant will receive a Digital Certificate.

Important Note

Only the **Top 40 shortlisted teams** will participate in the Offline 24-Hour Grand Finale.

We encourage every participant to think creatively, build responsibly, and focus on solving real-world challenges.
